

Warm Up: Simplify the following expression completely

$$\begin{aligned} & -((2x - 4) + 3(5 - 2x)) \\ & -2x + 4 + 15 - 6x \\ & -8x + 19 \end{aligned}$$

- ① P
- ② E
- ③ M & D
(distribute)
- ④ A & S
(like terms)

Stations Directions:

- 1) Start at any station
- 2) Complete the math at the station
& show your work
- 3) Look for your answer in a box on the bottom right of another station (complete that station next)
- 4) Continue until all stations are complete
