

**Warm Up:** Sketch  $y = \sin x$  and  $y = \cos x$  on one graph over the interval  $[-2\pi, 0]$ .   
*origin* *max* *4 equal parts*

# Drawing Graphs & Writing Equations

$a \cdot y$   
 $a \cdot f(x)$   
 dilation on y-axis

x	0	$\frac{\pi}{2}$	$\pi$	$\frac{3\pi}{2}$	$2\pi$
$\sin x$	0	1	0	-1	0
$2\sin x$	0	2	0	-2	0
$\frac{1}{2}\sin x$	0	$\frac{1}{2}$	0	$-\frac{1}{2}$	0

So let's summarize the differences

	$y = \sin x$	$y = 2\sin x$	$y = \frac{1}{2}\sin x$
Max	1	2	$\frac{1}{2}$
Min	-1	-2	$-\frac{1}{2}$

amplitude -  $\frac{1}{2}$  distance between the max + min  
 (always positive)  
 \* distance from middle to max \*

Examples:

1) Graph the equation  $y=4\cos x$  in the domain  $\pi \leq x \leq \pi$  interval

$y=4\cos x$   
 amplitude = 4  
 start @ max  
 max = 4  
 min = -4

2. The graph below incorrectly represents the equations  $y = 2\cos x$ . Write a mathematical explanation of why this graph is incorrect.

↑  
 Indicates amplitude = 2, but amplitude = 1

**Warm Up:** What is the amplitude of the function shown  $\frac{1}{2}$  dist between max + min in the accompanying graph?

- a) 1.5    b) 2    c) 6    d) 12

	ZERO	MAXIMUM	ZERO	MINIMUM	ZERO
$y=\sin x$					
$y=\sin 2x$					
$y=\sin \frac{1}{2}x$					

	$y=\sin x$	$y=\sin 2x$	$y=\sin \frac{1}{2}x$
PERIOD			
FREQUENCY			

frequency-

Sketch the graph of  $y=3\sin 2x$  in the interval  $-\pi \leq x \leq \pi$ .

The voltage used by most households can be modeled by a sine function. The maximum voltage is 120 volts, and there are 60 cycles *every second*. Which equation best represents the value of the voltage as it flows through the electric wires, where  $t$  is time in seconds?

- 1)  $V = 120 \sin(t)$
- 2)  $V = 120 \sin(60t)$
- 3)  $V = 120 \sin(60 \pi t)$
- 4)  $V = 120 \sin(120 \pi t)$

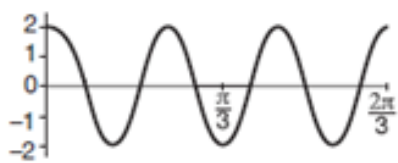

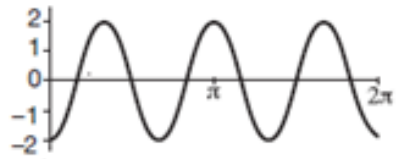

The graph below represents the height above the ground,  $h$ , in inches, of a point on a triathlete's bike wheel during a training ride in terms of time,  $t$ , in seconds.

Identify the period of the graph and describe what the period represents in this context.

Which graph represents a cosine function with no horizontal shift, an amplitude of 2, and a period of  $\frac{2\pi}{3}$ ?

- 1) 
- 2) 
- 3) 
- 4) 

Which sinusoid has the greatest amplitude?

2)  $y = 3 \sin(\theta - 3) + 5$

4)  $y = -5 \sin(\theta - 1) - 3$

**SUMMARY:**

- > *Amplitude* =  $|a|$
- > *Frequency* =  $|b|$
- > *Period* =  $\frac{2\pi}{|b|}$

**Homework:****p. 454 #29-35 odd**

In 27-38. sketch one cycle of each function.

**29.**  $y = \sin 2x$

**31.**  $y = \cos 3x$

**33.**  $y = 4 \sin 3x$

**35.**  $y = -\sin 2x$
